# 1 Overview

This document describes the REST API exposed by the Lead Management System.

Base URL:

`https://YOUR-BACKEND-URL.onrender.com/api`

Authentication uses JSON Web Tokens (JWT).

For protected endpoints include:

Authorization: Bearer <token>

## 2 Authentication

### 2.1 Register User

**POST**

`/auth/register`

Request Body

```
{
  "name": "Admin",
  "email": "admin@test.com",
  "password": "123456",
  "role": "admin"
}
```

Response

201 Created

```
{
  "success": true,
  "message": "User registered successfully"
}
```

### 2.2 Login

**POST**

`/auth/login`

Request

```
{
  "email": "admin@test.com",
  "password": "123456"
}
```

Response

200 OK

```
{
  "token": "JWT_TOKEN",
  "user": {...}
}
```

## 2.3 Current User

### GET

/auth/me

Authentication Required

## 3 Public Lead Submission

### 3.1 Create Lead

#### POST

/public

Request

```
{
  "name": "John Doe",
  "email": "john@email.com",
  "phone": "9876543210",
  "company": "ABC Pvt Ltd",
  "source": "Website"
}
```

Response

201 Created

```
{
  "success": true,
  "message": "Lead submitted successfully"
}
```

## 4 Lead Management

### 4.1 Get All Leads

#### GET

/leads

Supports

- Pagination
- Search
- Status filtering
- Sorting

Example

/leads?page=1&limit=10&status=New

## 4.2 Create Lead

**POST**

/leads

Authentication Required

## 4.3 Get Lead By ID

**GET**

/leads/:id

## 4.4 Update Lead

**PUT**

/leads/:id

## 4.5 Delete Lead

**DELETE**

/leads/:id

Admin only.

# 5 Lead Assignment

## 5.1 Assign Lead

**PATCH**

/leads/:id/assign

Request

```
{  
  "assignedTo": "USER_ID"  
}
```

Admin only.

# 6 Lead Status

## 6.1 Update Status

**PATCH**

/leads/:id/status

Request

```
{
  "status": "Qualified"
}
```

Possible Status Values

- New
- Contacted
- Qualified
- Proposal Sent
- Won
- Lost

## 7 Lead Timeline

### 7.1 Activity History

**GET**

`/leads/:id/timeline`

Returns chronological activity for a lead.

## 8 Notes

### 8.1 Get Notes

**GET**

`/leads/:id/notes`

### 8.2 Create Note

**POST**

`/leads/:id/notes`

Request

```
{
  "content": "Customer requested follow-up next week."
}
```

### 8.3 Delete Note

**DELETE**

`/notes/:noteId`

Only the note creator or an administrator may delete a note.

## 9 Users

### 9.1 Get Members

#### GET

/users

Returns all registered users.

## 10 Authentication Summary

| Endpoint            | Method | Authentication |
|---------------------|--------|----------------|
| /auth/register      | POST   | Public         |
| /auth/login         | POST   | Public         |
| /public             | POST   | Public         |
| /leads              | GET    | JWT            |
| /leads              | POST   | JWT            |
| /leads/:id          | PUT    | JWT            |
| /leads/:id          | DELETE | Admin          |
| /leads/:id/status   | PATCH  | JWT            |
| /leads/:id/assign   | PATCH  | Admin          |
| /leads/:id/timeline | GET    | JWT            |
| /leads/:id/notes    | GET    | JWT            |
| /leads/:id/notes    | POST   | JWT            |
| /notes/:id          | DELETE | JWT            |
| /users              | GET    | JWT            |

## 11 HTTP Status Codes

|     |                                                |
|-----|------------------------------------------------|
| 200 | Request completed successfully                 |
| 201 | Resource created successfully                  |
| 400 | Invalid request or validation error            |
| 401 | Authentication required or invalid credentials |
| 403 | Permission denied                              |
| 404 | Resource not found                             |
| 409 | Duplicate resource                             |
| 500 | Internal server error                          |
